

Why choose DeepLearning.AI's foundational courses?

- Learn from industry experts: Study with AI leaders including Andrew Ng, Sharon Zhou, and Joe Reis
- Built for career impact: Gain experience in everything from AI basics to advanced deep learning with structured learning programs
- Proven curriculum: Join millions of learners who've successfully advanced their careers in AI through highly rated courses
- New programs: Explore our newly released Data Engineering and Generative AI for Software Development professional certificates
- Earn a certificate: Demonstrate your knowledge by earning an industry recognized certificate that you can add to your resume and share online

Strong foundations matter, and with ground-up understanding, you'll be better equipped to tackle complex challenges, diagnose issues, and implement effective solutions.

Pro tip: Many employers offer education reimbursement - check if you can expense your investment in continued education!
